Professional Summary

Full-stack developer and Computer Science undergraduate (8.4 CGPA) with hands-on experience building scalable web applications using Java, Spring Boot, the MERN stack, and REST APIs. Skilled in designing, developing, and deploying production-ready applications, with working knowledge of AI-driven tools and prompt engineering. Seeking a Software Developer / Full Stack Developer role to apply strong problem-solving and system design skills.

Technical Skills

Languages: Java, Python, JavaScript, SQL, HTML, CSS

Frameworks & Libraries: Spring Boot, React.js, Node.js, Express.js

Databases: MongoDB, MySQL, SQL

Tools & Platforms: Git, GitHub, REST APIs, Postman

Core Concepts: Data Structures & Algorithms, Object-Oriented Programming, Artificial Intelligence, Prompt Engineering, Problem Solving

Experience

Java Full Stack Intern, JSpiders Rajajinagar

Feb 2026 – Present

- Developing full-stack web applications using Java, HTML, CSS, JavaScript, and SQL as part of a structured Java Full Stack training program.
- Building frontend interfaces and backend applications with database integration, applying industry-standard development practices.

Projects

Lyra Prompt Optimizer | React.js, Node.js, Express.js, MongoDB, LLM APIs

Jul 2026

Live Website

- Built a MERN stack web application that transforms unclear user prompts into optimized, structured prompts for LLMs including ChatGPT, Claude, and Gemini.
- Designed a responsive React.js interface for creating, editing, and managing prompt templates, reducing prompt iteration time for users by [X]%.
- Integrated [specific LLM API, e.g., OpenAI API] to generate and refine prompt structures in real time.
- Implemented RESTful APIs with Node.js and Express.js, using MongoDB for persistent storage of user prompts and history.

Digital Learning System for Nabha | MERN Stack (MongoDB, Express.js, React.js, Node.js)

Mar – May 2026

Live Website

- Developed a full-stack e-learning platform enabling course management, online assessments, and assignment submission for [X] students and educators.
- Implemented secure, role-based authentication (student / teacher / admin) using [Auth method, e.g., JWT] to protect access across user roles.
- Built real-time communication and progress-tracking features to improve engagement between students and instructors.
- Designed a REST API layer with Express.js and MongoDB to support scalable content and assessment management.

Lost And Found Portal | Java, Spring Boot, MySQL, REST APIs

Apr – Jun 2026

Live Website

- Built a web application using Java and Spring Boot enabling users to report, search, and manage lost and found items securely.
- Designed relational database schema in MySQL to manage item listings, user accounts, and image uploads.
- Implemented RESTful APIs for item posting, search/filter functionality, and user-to-user communication.
- Reduced item-recovery turnaround by [X]% through streamlined search and matching logic.

Banking Fraud Detection | Java, Spring Boot, Machine Learning

Apr – Jun 2026

- Built an intelligent fraud detection system using Java and Spring Boot to analyze financial transactions in real time.
- Applied machine learning algorithms to identify suspicious transaction patterns, improving detection accuracy to [X]%.
- Designed backend services and REST APIs to process and flag transactions for review by financial institutions.

Education

Sharnbasva University, Kalaburagi, Karnataka

2022 – 2026

Bachelor of Engineering, Computer Science and Engineering – CGPA: 8.4

Doddappa Appa Independent PU Science College, Kalaburagi, Karnataka

2020 – 2022

Pre-University (PCMB) – Percentage: 60.16%

Soft Skills & Extracurricular Activities

Soft Skills: Communication | Leadership | Teamwork | Decision Making | Problem Solving

Extracurricular: Singing, Guitar, Content Creation, Football, Badminton
